ENDOCELL

ENDOMETRIAL SAMPLER

Special features of the Endocell combine to make endometrial sampling easier for you and more comfortable for your patient.

- the Endocell is stiffer so as to pass smoothly and gently through even a tight cervix
- moulds easily into a curve for easier insertion
- “O” ring in the pistons for an excellent vacuum and smoother action
- flat ridged non-slip handle
- larger (1ml) volume than other samplers
- single side port to ensure sample is from a large area of the uterus

Perform your own evaluation and see for yourself how Endocell can improve your service at no extra cost

**You and your patients
deserve the best.**
