Delivery Address: _____

Invoice Address: _____

Cup Size	A / B	C / D	DD / E
	5cm or less	5 - 10cm	10 - 15cm

If more than 15cm, go up one band size

It is recommended that measurements are taken when the oedema is at its most reduced state. Often this is found first thing in the morning.

Measurement Points

1. Measure in cm the circumference at Point 1. Located directly under the bust (where a regular bra sits)
2. Move 5 - 7cm down towards the rib cage from Point 1 and measure circumference at Point 2
3. To determine the band size, take the larger of the two measurements from Point 1 or Point 2
4. Measure the circumference at Point 3 at the fullest part of the bust
5. To determine the cup size, subtract the larger of the two measurements from Point 1 or Point 2 from the bust measurement (Point 3). Use the difference in the chart below to select the cup size
