### Legpiece - simple measuring points

1. Measure the calf and ankle circumference (as shown on diagram)
2. Use chart below to determine size at the top of the column (if 2 measurements do not fit in same column the smaller size should accommodate reducing the oedema)
3. Measure the length of the leg posteriorly (B-D) and follow the contour of the leg. Select regular or tall

†Measurement only required when ordering additional JOBST® FarrowHybrid®

When you order a JOBST® FarrowWrap® 4000 you will receive 1 x JOBST® FarrowHybrid® (20-30mmHg) wide
