

Esophageal Dilatation Systems

M-Flex® Blue Silicone Bougies

There's nothing more flexible than an M-Flex.®

Our silicone bougies feature added flexibility that some users prefer. Tungsten-filled and not made with natural rubber latex, there's nothing quite like the M-Flex.®

Benefits

- Ultra-flexible tapered tip (Maloney)
- Completely radiopaque from distal tip to proximal end
- American and European depth markings
- Mercury-free and not made with natural rubber latex
- Autoclavable for quick reprocessing

Features

- 21 sizes: 20 FR to 60 FR (in 2 FR increments)
- Choose a full set, mini set or individual pieces
- Three-year warranty on product and workmanship
- Easy disposal
- No charge trade-in program for proper disposal of expired mercury-filled bougies (with purchase of new product)

Store and transport M-Flex® bougies in our storage case which holds up to two full sets.

M-Flex® Dilatation Systems

Set	Part No.	Contents
Maloney (tapered) 21-piece full set	1206-00	21 bougies, 20-60 FR
Maloney (tapered) 10-piece mini set	1206-10	10 bougies, 36-54 FR
Hurst (blunt) 21-piece full set	1207-00	21 bougies, 20-60 FR
Hurst (blunt) 10-piece mini set	1207-10	10 bougies, 36-54 FR
Bougie Storage Case	1210-01	Heavy-duty storage for up to 46 bougies. 32"L x 7"W x 4"H

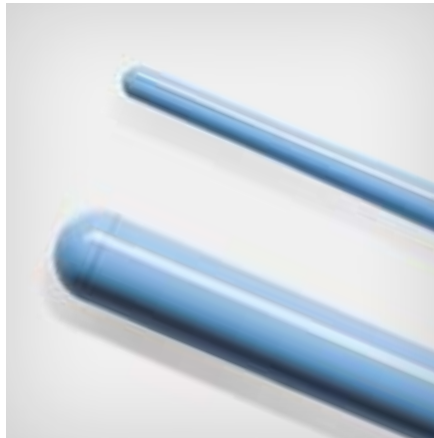

Our storage case allows easy identification of bougie size. Removing plexiglass window provides easy access.

End caps display French size.

Extra flexible tip.

Top: Maloney tip. Bottom: Hurst tip.

WeightRight® Mercury-Free Bougies

Heavy-weight control and convenience combined.

Our tungsten-filled bougie mimics the weight and feel of mercury-filled bougies without the concerns of mercury usage and disposal. It's the weight you expect, and the convenience you demand.

Benefits

- Completely radiopaque from distal tip to proximal end
- Flexible material does not attract particulate
- American and European depth markings
- Mercury-free and not made with natural rubber latex

Features

- 23 sizes: 16 FR to 60 FR (in 2 FR increments)
- Choose a full set, mini set or individual pieces
- Three-year warranty on product and workmanship
- Easy disposal
- No charge trade-in program for proper disposal of expired mercury-filled bougies (with purchase of new product)

Store and transport WeightRight® bougies in our storage case.

SafeGuide® Over the Guidewire Esophageal Dilators

Flexibility and control for exacting procedures.

At times, there is need for greater accuracy. That's why there's SafeGuide®, a remarkably flexible over the guidewire solution that ensures exact placement of the dilator. Position the guidewire with the assistance of an endoscope and direct the SafeGuide® dilator where you need it.

Benefits

- Completely radiopaque from distal tip to proximal end
- Flexible material does not attract particulate
- American and European depth markings
- Not made with natural rubber latex
- Dilators are reusable

Features

- 16 sizes: 15 FR to 60 FR (in 3 FR increments)
- Choose a full set, mini set or individual pieces
- Easy to clean with optional brushes and adapters
- With proper care, reusable SafeGuide® dilators provide years of service

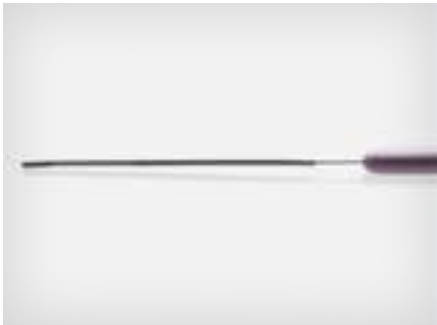

SafeGuide® Dilatation Systems

Set	Part No.	Contents
16-piece full set	1214-00	16 dilators, 15-60 FR, 1 storage case, 1 marked spring tip guidewire, 1 reusable cleaning brush, 25 disposable cleaning adapters
7-piece mini set	1214-10	7 dilators (15, 21, 27, 33, 39, 42, 45 FR), 1 storage case, 1 marked spring tip guidewire, 1 reusable cleaning brush, 25 disposable cleaning adapters
Custom mini set	Contact your sales representative	7 dilators of your choice, 1 storage case, 1 marked spring tip guidewire, 1 reusable cleaning brush, 25 disposable cleaning adapters

Store and transport SafeGuide® dilators in a convenient storage case. A labeled slot holds each dilator secure. The case holds a full set of 16 dilators.

The single-piece construction of the SafeGuide® Spring Tip Guidewire resists breakage and flexes easily.

Is it time to replace your esophageal bougies or wire-guided dilators?

Replace bougies when you notice:

- End cap separating from bougie
- Cuts, cracks or nicks
- Flaking or peeling of the outer coating
- Faded or missing markings
- Expired or missing expiration dates

Replace wire-guided dilators when you notice:

- Loss of flexibility
- Cuts, cracks or nicks
- Stretching in the inner lumen
- Faded or missing markings
- Curved dilator or curled tapered tip
- Expired
